Welcome to Microsoft Azure training and certifications

Our approach to learning is to develop an inclusive environment for every stage in an individual's career.

How to use this deck

The following resources will prepare you for the learning experience.

Training journey

Recommended tracks to help you identify where to start your training and where to go based on your role or projects.

Role	Certification	Exam
Developer	Microsoft Certified: Azure Developer Associate	AZ-204
	Microsoft Certified: Azure DevOps Engineer Expert	AZ-400
	Microsoft Certified: Azure AI Engineer Associate	AI-900
	Microsoft Certified: Azure Data Engineer Associate	DP-900
	Microsoft Certified: Azure Database Administrator Associate	DB-900
System Administrator	Microsoft Certified: Azure System Administrator	AZ-800
	Microsoft Certified: Azure Network Administrator Associate	AZ-900
Security	Microsoft Certified: Azure Security Engineer Associate	AZ-500
	Microsoft Certified: Azure Information Protection Administrator Associate	AI-500

Certification portfolio

Available certifications and associated exams in portfolio.

Certification overview

Identify the right candidate profile with the recommended skills knowledge and experience.

Certification journey

Recommended steps to earn a certification, including preparation resources and opportunities for continue learning.

Certification learning path

Recommended training content to prepare for certification exams, including self-paced training and Microsoft Official Courseware (MOC) delivered by Learning Partners.

Azure training journey for IT pros

Master the basics

New to the cloud or new to Azure

Azure fundamentals

 Azure Fundamentals

Grow in role

Start here

Implement, manage, and monitor cloud solutions

Azure administrator

 Azure Administrator Associate

Implement and manage secure cloud solutions

Azure security engineer

 Azure Security Engineer Associate

Design and implement end to end cloud solutions

Azure solutions architect

 Azure Solutions Architect Expert

Manage SAP solutions on Azure

Azure for SAP workloads

 Azure for SAP Workloads Specialty

Deliver continuous value integrating people, processes, and technologies

DevOps engineer

 DevOps Engineer Expert

Bring cloud agility on-premises

Azure Stack Hub operator

 Azure Stack Hub Operator Associate

Deliver virtual desktop experiences and remote apps on Azure

Administrator for Azure Virtual Desktop

 Azure Virtual Desktop Specialty

Continue to grow with additional training

Migrate apps & infrastructure to the cloud

Manage Windows Server and hybrid cloud solutions

Manage Linux on Azure

Azure training journey for developers

Overview of Microsoft Certified: **Azure** Fundamentals

Get started at:
aka.ms/AzureCerts_Fundamentals

Exam details

Who is this certification for?

Candidates for this certification should have foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

AZ-900:
Microsoft Azure Fundamentals

Skills measured:

- Describe cloud concepts
- Describe core Azure services
- Describe security, privacy, compliance, and trust
- Describe Azure pricing Service Level Agreements and Lifecycles

Knowledge and experience:

A candidate for this exam should be able to demonstrate a fundamental knowledge of cloud concepts, as well as Azure services, workloads, security, privacy, pricing, and support. In addition, a candidate should be familiar with concepts of networking, storage, compute, application support, and application development.

Certification

Pass certification exam
AZ-900 to earn this certification

Microsoft Certified:
Azure Fundamentals

Azure Fundamentals validates foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

Products featured

- Microsoft Azure

The journey to Microsoft Certified:

Azure Fundamentals

aka.ms/AzureCerts_DataFundamentals

Exam details

DP-900:
Microsoft Azure Data Fundamentals

Skills measured:

- Describe core data concepts
- Describe how to work with relational data on Azure
- Describe how to work with non-relational data on Azure
- Describe an analytics workload on Azure

Knowledge and experience:

A candidate for this exam should be familiar with the concepts of relational and non-relational data, and different types of data workloads such as transactional or analytical.

Certification

Pass certification exam
DP-900 to earn this certification

Microsoft Certified:
Azure Data Fundamentals

Azure Data Fundamentals validates foundational knowledge of core data concepts and how they are implemented using Microsoft Azure data services.

Products featured

- Microsoft Azure
- Microsoft SQL Server

Microsoft Azure AI Fundamentals

Pass certification exam AI-900 to earn this certification

Microsoft Certified:
Azure AI Fundamentals

Azure Administrator Associate

Exam details

AZ-104:
Microsoft Azure Administrator

Skills measured:

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Configure and manage virtual networking
- Monitor and back up Azure resources

Knowledge and experience:

A candidate for this exam should have at least six months of hands-on experience administering Azure, along with a strong understanding of core Azure services, Azure workloads, security, and governance. In addition, this role should have experience using PowerShell, Azure CLI, Azure portal, and Azure Resource Manager templates.

Certification

Pass certification exam
AZ-104 to earn this certification

Microsoft Certified:
Azure Administrator Associate

Azure Administrators implement, manage, and monitor an organization's Microsoft Azure environment.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have subject matter expertise implementing, managing, and monitoring an organization's Microsoft Azure environment. Responsibilities for this role include implementing, managing, and monitoring identity, governance, storage, compute, and virtual networks in a cloud environment, plus provision, size, monitor, and adjust resources, when needed.

Azure Security Engineer Associate

Get started at:

aka.ms/AzureCerts_SecurityEngineer

Who is this certification for?

Candidates for this certification should have subject matter expertise implementing security controls and threat protection, managing identity and access, and protecting data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Responsibilities for this role include maintaining the security posture, identifying and remediating vulnerabilities by using a variety of security tools, implementing threat protection, and responding to security incident escalations.

Exam details

AZ-500:
Microsoft Azure Security Technologies

Skills measured:

- Manage identity and access
- Implement platform protection
- Manage security operations
- Secure data and applications

Knowledge and experience:

A candidate for this exam should have strong skills in scripting and automation; a deep understanding of networking, virtualization, and cloud N-tier architecture; and a strong familiarity with cloud capabilities and products and services for Azure, plus other Microsoft products and services.

Certification

Pass certification exam **AZ-500** to earn this certification

Microsoft Certified:
Azure Security Engineer Associate

Azure Security Engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Overview of Microsoft Certified:

Azure Stack Hub Operator Associate

Get started at:

aka.ms/AzureCerts_StackHubOperator

Who is this certification for?

Candidates for this certification are Azure administrators or Azure Stack Hub operators who provide cloud services to end users or customers from within their own datacenter using Azure Stack Hub.

Responsibilities include to plan, deploy, package, update, and maintain the Azure Stack Hub infrastructure. They also offer hybrid cloud resources and requested services and manage infrastructure as a service (IaaS) and platform as a service (PaaS).

Exam details

AZ-600:

Configuring and Operating a Hybrid Cloud with Microsoft Azure Stack Hub

Skills measured:

- Provide services
- Implement data center integration
- Manage identity and access
- Manage infrastructure

Knowledge and experience:

A candidate for this exam should have significant experience managing and operating Azure Stack Hub environments. They should have a strong understanding of Azure, in addition to some knowledge of virtualization, networking, and identity management. They need to understand how Azure Stack Hub enables DevOps processes and the hybrid development model.

Certification

Pass certification exam **AZ-600** to earn this certification

Microsoft Certified:
Azure Stack Hub Operator Associate

Azure Stack Hub operators provide cloud services to their end users or customers from within their own datacenter using Azure Stack Hub.

Azure Solutions Architect Expert

Get started at:
aka.ms/AzureCerts_SolutionsArchitect

Who is this certification for?

Candidates for this certification should have subject matter expertise in designing and implementing solutions that run on Microsoft Azure, including aspects like compute, network, storage, and security.

Responsibilities for this role include advising stakeholders and translating business requirements into secure, scalable, and reliable cloud solutions.

Exam details

AZ-303:
Microsoft Azure Architect Technologies

Skills measured:

- Implement and monitor an Azure infrastructure
- Implement management and security solutions
- Implement solutions for apps
- Implement and manage data platforms

Knowledge and experience:

A candidate for this exam should have advanced experience and knowledge of IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platform, budgeting, and governance.

AZ-304:
Microsoft Azure Architect Design

Skills measured:

- Design monitoring
- Design identity and security
- Design data storage
- Design business continuity
- Design infrastructure

Knowledge and experience:

A candidate for this exam should have advanced experience and knowledge of IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platform, budgeting, and governance.

Certification

Pass certification exams **AZ-303** and **AZ-304** to earn this certification

Microsoft Certified:
Azure Solutions Architect Expert

Azure Solution Architects design and implement solutions that run on Microsoft Azure, including aspects like compute, network, storage, and security.

Azure for SAP Workloads Specialty

Exam details

Who is this certification for?

Candidates for this certification should be architects or engineers with extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the initial migration or integration and the long-term operation of an SAP solution on Microsoft Azure.

Responsibilities for this role include making recommendations on services and adjust resources as appropriate for optimal resiliency, performance, scale, provision, size, and monitoring.

AZ-120:
Planning and Administering Microsoft Azure for SAP Workloads

Skills measured:

- Migrate SAP Workloads to Azure
- Design an Azure Solution to Support SAP Workloads
- Build and Deploy Azure for SAP Workloads
- Validate Azure Infrastructure for SAP Workloads
- Operationalize Azure SAP Architecture

Knowledge and experience:

A candidate for this exam should have extensive experience and knowledge of SAP applications: SAP HANA, S/4HANA, SAP NetWeaver, SAP BW/4HANA, OS servers for SAP applications and databases, Azure portal, ARM templates, operating systems, virtualization, cloud infrastructure, storage structures, high availability design, disaster recovery design, data protection concepts, and networking.

Certification

Pass certification exam **AZ-120** to earn this certification

Microsoft Certified:
Azure for SAP Workloads Specialty

Architects or engineers for Azure for SAP Workloads have extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the long-term operation of an SAP solution on Microsoft Azure.

Azure Virtual Desktop Specialty

Get started at:

aka.ms/AzureCerts_VirtualDesktop

Who is this certification for?

Candidates for the Azure Virtual Desktop Specialty certification are administrators with subject matter expertise in planning, delivering, and managing virtual desktop experiences and remote apps, for any device, on Azure.

Responsibilities for this role include deploying virtual desktop experiences and apps to Azure. Professionals in this role deliver applications on Azure Virtual Desktop and optimize them to run in multi-session virtual environments. To deliver these experiences, they work closely with Azure administrators and architects, along with Microsoft 365 administrators.

Exam details

AZ-140:
Configuring and Operating Microsoft Azure Virtual Desktop

Skills measured:

- Plan an Azure Virtual Desktop architecture
- Implement an Azure Virtual Desktop infrastructure
- Manage access and security
- Manage user environments and apps
- Monitor and maintain an Azure Virtual Desktop infrastructure

Knowledge and experience:

Candidates for this certification should have experience in Azure technologies, including virtualization, networking, identity, storage, backups, resilience, and disaster recovery. They should understand on-premises virtual desktop infrastructure technologies as they relate to migrating to Windows Virtual Desktop. These professionals use the Azure portal and Azure Resource Manager templates to accomplish many of their tasks. They might use PowerShell and Azure Command-Line Interface (CLI) for more efficient automation.

Certification

Pass certification exam **AZ-140** to earn this certification

Microsoft Certified:

Exam details

AZ-204:
Developing Solutions for Microsoft Azure

Skills measured:

- Develop Azure compute solutions
- Develop for Azure storage
- Implement Azure security
- Monitor, troubleshoot, and optimize Azure solutions
- Connect to and consume Azure services and third-party services

Knowledge and experience:

A candidate for this exam should have 1-2 years professional development experience and experience with Microsoft Azure. In addition, have ability programming in a language supported by Azure and proficiency in Azure SDKs, Azure PowerShell, Azure CLI, data storage options, data connections, APIs, app authentication and authorization, compute and container deployment, debugging, performance tuning, and monitoring.

Overview of Microsoft Certified: DevOps Engineer Expert

Get started at:
aka.ms/AzureCerts_DevOpsEngineer

Who is this certification for?

Candidates for this certification should have subject matter expertise working with people, processes, and technologies to continuously deliver business value.

Candidates must be familiar with both Azure administration and development and must be expert in at least one of these areas.

Prerequisite

Certification option 1

- [Azure Administrator Associate](#)

OR

Certification option 2

- [Azure Developer Associate](#)

Exam details

AZ-400:
[Designing and Implementing Microsoft DevOps Solutions](#)

Skills measured:

- Develop an instrumentation strategy
- Develop a Site Reliability Engineering (SRE) strategy
- Develop a security and compliance plan
- Manage source control
- Facilitate communication and collaboration
- Define and implement continuous integration
- Define and implement a continuous delivery and release management strategy

Knowledge and experience:

A candidate for this exam should have expertise implementing strategies for collaboration, code, infrastructure, source control, security, compliance, continuous integration, testing, delivery, monitoring, and feedback. Additionally, a candidate must be familiar with both Azure administration and development and must be expert in at least one of these areas.

Azure IoT Developer Specialty

Who is this certification for?

Candidates for this certification should have subject matter expertise creating and maintaining the cloud and edge portions of an Azure IoT solution.

Responsibilities for this role include managing the device lifecycle set up, configuration, and maintenance— using cloud services and other tools, implementing designs for Azure IoT solutions including device topology, connectivity, debugging, and security, implementing solutions to manage, monitor, and transform IoT-related data pipelines, deploying Azure IoT Edge components, and configuring device networking on the edge.

Exam details

AZ-220:
Microsoft Azure IoT Developer

Skills measured:

- Set up the IoT solution infrastructure
- Provision and manage devices
- Implement Edge
- Implement Business Integration
- Process and manage data
- Monitor, troubleshoot, and optimize IoT solutions
- Implement security

Knowledge and experience:

A candidate for this exam should have general understanding of devices types and Azure services, including data storage options, data analysis, data processing, AI, and other Platform as a Service options. IoT Developers must be able to program in at least one Azure IoT SDK-supported language.

Certification

Pass certification exam

Azure Database Administrator Associate

Exam details

Who is this certification for?

Candidates for this certification should be data management specialists with subject matter expertise implementing and managing cloud and on-premises relational databases built on top of Microsoft SQL Server and Azure data services. Responsibilities for this role include database management, availability, and security, plus performance monitoring and optimization of modern relational database solutions.

DP-300:

Administering Relational Databases on Microsoft Azure (beta)

Skills measured:

- Plan and implement data platform resources
- Implement a secure environment
- Monitor and optimize operational resources
- Optimize query performance
- Perform automation of tasks
- Plan and implement a High Availability and Disaster Recovery (HADR) environment
- Perform administration by using T-SQL

Knowledge and experience:

A candidate for this exam should have experience using a variety of methods and tools to perform day-to-day operations, including applying knowledge of using T-SQL.

Certification

Pass certification exam

Azure Data Engineer Associate

Who is this certification for?

Candidates for this certification have subject matter expertise integrating, transforming, and consolidating data from various structured and unstructured data systems into structures that are suitable for building analytics solutions.

Responsibilities for this role include helping stakeholders understand the data through exploration, building and maintaining secure and compliant data processing pipelines by using different tools and techniques. This professional uses various Azure data services and languages to store and produce cleansed and enhanced datasets for analysis.

Exam details

DP-203:
Data Engineering on Microsoft Azure

Skills measured:

- Design and implement data storage
- Design and develop data processing
- Design and implement data security
- Monitor and optimize data storage and data processing

Knowledge and experience:

Candidates for this exam must have solid knowledge of data processing languages, such as SQL, Python, or Scala, and they need to understand parallel processing and data architecture patterns.

Certification

Pass certification exam **DP-203** to earn this certification
